Washington HYS results generated at AskHYS.net on 03-15-2022

Grade: 12

Number of Students Surveyed: 220

Background:

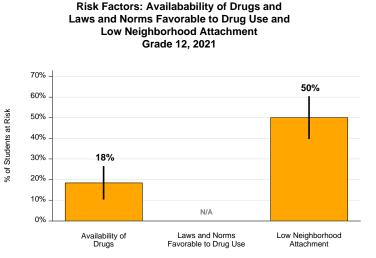

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each "factor" in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the "percent of students at risk," which is defined as the percent of students whose scores were above a risk cutpoint determined by UW researchers. We also report some of the individual questions.
- Risk factors in the community environment point to youth perceptions of local attitudes, beliefs, and standards: if youth perceive that people in the community look the other way when youth are using substances, the youth have a higher likelihood of using these substances. If youth perceive access to substances is easy, there is a higher likelihood they will engage in the problem behavior - that is, they are "at risk."

healthy Fact Sheet Depressive Feelings, Anxiety and Suicide for Longview School District in 2021

Depressive Feelings...

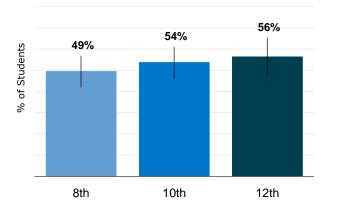

Students who report feeling sad or hopeless

for at least two weeks in the past year

Support...

Students who report they have an adult to turn to when they feel sad or hopeless

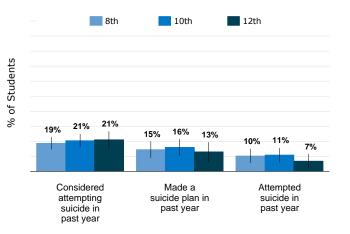

For help and information about what you can do, contact:

- National Suicide Prevention Lifeline: 1-800-273-TALK (8225) or www.suicidepreventionlifeline.org
- For help, text "HOME" to 741741 for a 24/7, free, confidential crisis counselor or call 1-800-TEENLINK (833-6546) to speak with a caring teen.

The data in these charts are based on the State of Washington's Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the anonymous survey.

Suicidal Feelings and Actions...

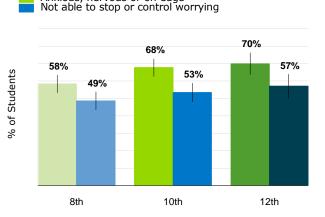

Students who report considering suicide, making a suicide plan, and attempting suicide in the past year

Feeling Anxious and not able to Stop Worrying...

Students who report feeling nervous, anxious or over the edge or not being able to stop or control worrying in the past 2 weeks

Anxious, nervous or on edge

YOU can save a life:

- · Take it Seriously
- Understand the risk factors and watch for the warning signs (https://afsp.org/about-suicide/risk-factors-and-warning-signs).
- Emphasize, don't rationalize. Show you care. "I'm worried about you" or "I want to help you".
- · Ask if they are thinking about killing themselves.
- Get help. Don't keep it a secret!

For more results from the 2021 Healthy Youth Survey, please visit www.AskHYS.net

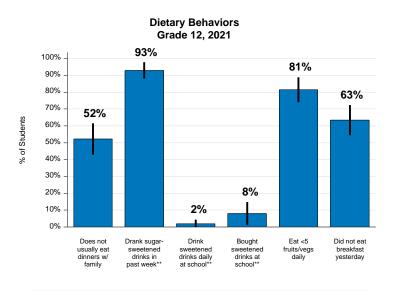

• A nutritious diet can reduce major risk factors for chronic disease such as obesity, high blood pressure, diabetes, and high blood cholesterol.

- · Poor nutrition has the potential to affect the growth, development, health status and academic achievement of children and adolescents.
- Individual food choices are made within the context of the family and the community.
- In order to be able to choose a nutritious diet, an affordable supply of healthy foods must be available.

Grade: 12 Sex: All

% of Students

Number of Students Surveyed: 220

Background:

- · Regular physical activity reduces rates of obesity and serious diseases, helps people maintain a healthy body weight and improves quality of life.
- The Centers for Disease Control and Prevention recommends that children and adolescents participate in at least 60 minutes of physical activity daily, and muscle strengthening exercises 3 days a week.
- Increased time spent in recreational screen time, such as watching TV, playing video games, using a computer for fun, or cell phone usage, means less time for students to be physically active.
- Many social and environmental factors influence the decision to be active. Successful strategies to promote physical activity include educating individuals and developing policies in schools and communities to create environments that support being physically active.

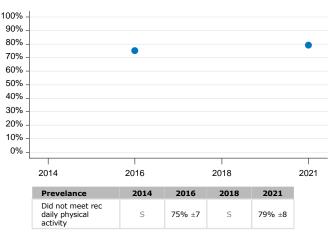

For More Information:

- Visit the Washington State Healthy Eating Active Living Program website: www.doh.wa.gov.
- Visit the National Physical Activity Plan: www.physicalactivityplan.org.
- Visit CDC Physical activity guidelines: www.cdc.gov/physicalactivity/everyone/guidelines/children.html.
- Note: DOH advocates using the CDC recommendations of 'at least 60 minutes of physical activity daily.'

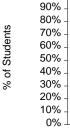

Physical Activity 2014-2021, Grade 12

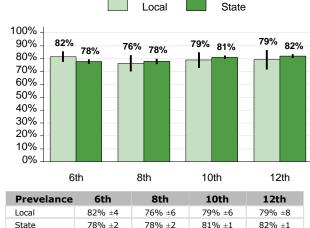

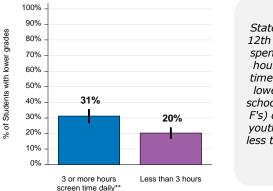

In 2021, 79% of 12th graders in our school district did not meet the recommendations for 60 minutes of physical activity 7 days a week.

Statewide Relationship between Lower Grades and 3 or More Hours of Screen Time Daily** Grade 12. 2021

Statewide, more 12th graders who spend 3 or more hours of screen time daily report lower grades in school (C's, D's or *F*'s) compared to youth who spend less than 3 hours.

Washington HYS results generated at AskHYS.net on 03-15-2022

**In 2018, the definition of screen time was expanded to include more examples than in previous years. However, school work-related screen time is not included.

Prevalence is displayed with 95% confidence intervals (as \pm or black bar)

% of

healthy Teen Prescription Misuse for Longview School District in 2021

Background:

vxuth

- · Prescription drug misuse is when someone takes a medication that was prescribed for someone else or takes their own prescription in a way not intended by a doctor---like to stay awake, or "to get high".
- Prescription drugs that affect the brain, including opioid pain killers, stimulants, and depressants, may cause physical dependence that can turn into addiction.
- Most teens get prescription drugs they misuse and use from friends and relatives, sometimes without the person knowing.
- Prescription drug misuse has become an important health issue, particularly the danger of misusing prescription pain medications. Each year, there continues to be more overdose deaths than deaths from motor vehicle crashes (CDC National Center for Health Statistics).

What can parents or caregivers do to prevent teen prescription misuse?

- Talk to your children about what you do to stay healthy, and, if you use medications, why they are safe for your personal use and not for them.
- Talk to your teen about the dangers of prescription drug misuse. Learn more at www.medicineabuseproject.org.
- Keep the most commonly misused prescription drugs (painkillers, sedatives and stimulants) in a lock box.
- Take steps to safeguard the most commonly misused prescription drugs (painkillers, sedatives, and stimulants) in your home: monitor their use, keep them in a lock box, and properly dispose of unused or expired medications.

For More Information:

The data in these charts are based on the Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the survey.

*Bullying is defined as when one or more students threaten, spread rumors about, hit, shove, or otherwise hurt another student over and over again. It is not bullying when two students of about the same strength or power argue or fight or tease each other in a friendly way.

Prevalence is displayed with 95% confidence intervals (as black bars |). "U" indicates data is unavailable, because of too few surveys completed, questions not asked, or other reasons.

Grade: 12

Sex: All

Number of Students Surveyed: 220

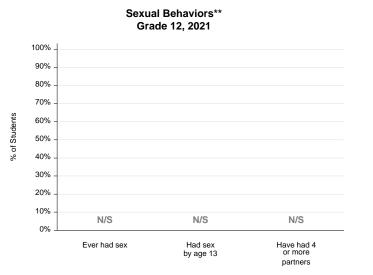

Background:

- Comprehensive Sexual Health Education is required for all students in grades 4-12, by the 2022-23 school year. Districts must ensure sexual health education follows requirements of RCW 28A.300.475 and other relevant state laws: https://www.k12.wa.us/student-success/resources-subject-area/sexual-health-education
- Washington Health Education K-12 Learning Standards provide guidance to districts, schools and teachers with grade-level outcomes related to sexual health education: www.k12.wa.us/HealthFitness/Standards.aspx.
- Evidence-based programs can significantly delay first intercourse, decrease sexual risk taking, and increase condom and contraceptive use: https://www.cdc.gov/healthyyouth/whatworks/what-works-sexual-health-education.htm.

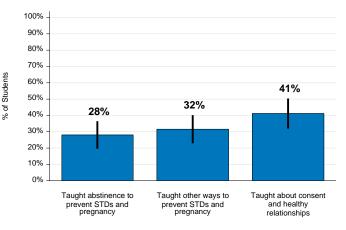

For More Information:

· Contact Sexual Health Education, Office of Superintendent of Public Instruction: https://www.k12.wa.us/student-success/resources-subject-area/sexual-health-education

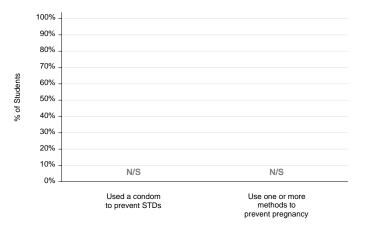

Questions about sexual behavior, orientation and gender were included at the discretion of each school district. Therefore, local results may be missing or may not reflect a representative sample of all students in the community. In order to improve the quality and usefulness of data, it is recommended that all schools include these questions when administering the Healthy Youth Survey.

Longview School District

Healthy Youth Survey

COMMERCIAL TOBACCO PRODUCT USE

Fact Sheet

Year: 2021

Grade: 12

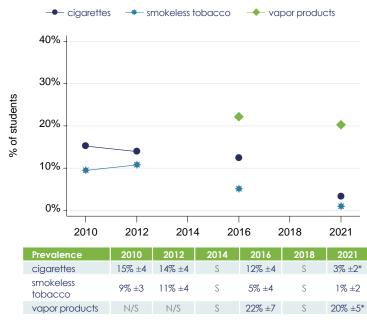

Sex: All Number

BACKGROUND

- Tobacco use remains the leading cause of preventable death and disease in Washington.
- Preventing youth initiation of tobacco and other nicotine use is critical to stem the tide of tobacco-related mortality, morbidity, and economic costs.
- Youth and young adults under age 18 are far more likely to start using tobacco than adults; nearly 9 out of 10 adults who smoke started by age 18.
- 104,000 Washington youth alive today will ultimately die prematurely from smoking.
- The emergence of vapor products (also called electronic cigarettes) has raised serious concern.
 Nicotine use can adversely affect brain development.
- The effects of nicotine exposure during youth and young adulthood can be long-lasting and can include lower impulse control and mood disorders. The nicotine in vapor products can prime young brains for tobacco use and addiction to other drugs.

Number of Students Surveyed: 220

Current (past 30-day) use trends, grade 12

27% 35% 17% 30% 21% 18% 25% 17% 20% 12% 15% 6% 10% 6% 5% 0% White** Hispanic Asian** Black or African Other race** Multi-racial** American Native Hawaiian/Pacific Indian/Alaska American** Native** Islander** **Non-Hispanic

Among 12th grade students, vaping varies by race and ethnicity. The highest rate of vaping is reported among Non-Hispanic American Indian/Alaska Native students and the lowest is among Non-Hispanic Asian and Black or African American students. However, rates for some of these race/ethnicity subgroups can vary widely.

results generated at www.askhys.net on 03/15/2022

- Vapor products are the most common nicotine product used by youth.
- Youth and young adults under age 18 are far more likely to start tobacco use than adults: 4 out of 5 smokers started during adolescence. According to the U.S. Surgeon General, there is a strong association between the use of e-cigarettes, cigarettes, and the use of other burned tobacco products by young people.
- The minimum age of purchase for tobacco and vapor products is 21, but youth can get these products from their older friends and classmates.
- In 2016, Washington State passed a Vapor Products law, establishing a statewide licensing system and important
 protections to reduce illegal youth access to vapor products. This law applies to any vapor product, whether or
 not it contains nicotine.

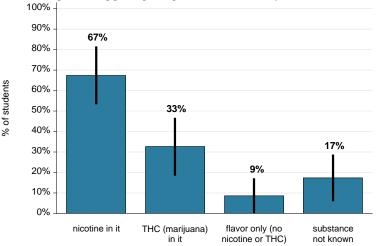

Current (past 30-day) vapor product use compared to the state, all grades

Statewide prevalence of past 30 day e-cigarette, cigarette, and use of both among youth by grade

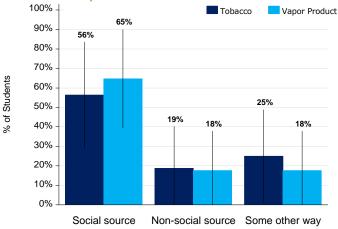

Reported substance "vaped" among current (30-day) vapor product users, Grade 12

*Students can select more than one type of substance

Source of tobacco and vapor products among those who use them, Grade 12

**Social sources include: giving money to someone, "bumming", from a person 18 or older, and taking from a store or family. Non-social sources include buying from a store, the internet, or a vending machine.

MORE INFORMATION...

- Through key partnerships, the Commercial Tobacco Prevention Program addresses youth access to tobacco and the growth in the use of electronic cigarettes and vapor products in Washington State. Find out more here: https://www.doh.wa.gov/YouandYourFamily/Tobacco
- For help quitting vaping, teens can text VAPEFREEWA to 88709 to sign up for This is Quitting, a program from Truth Initiative. For help quitting any commercial tobacco use, teens can download an app at <a href="https://doh.wa.gov/quitorcall.https://doh.wa.gov/quitorcalll.https://doh.wa.gov/quitorcalll.https://doh.wa.gov/quitorcalll.https://doh.wa.gov/quitorcalll.https://doh.wa.gov/quitorcallll.https://doh.wa.gov/quitorcallll.https://doh.wa.gov/quitorcallll/https://doh.wa.gov/quitorcallll/https://doh.wa.gov/quitorcallll/https://doh.wa.gov/quitorcallll/httpsitorcallll/https://doh.wa.gov/quitorcallll/httpsitorcallll/ht

healthy Fact Sheet yxuth **Unintentional Injury for Longview School District**

Year: 2021

Sex: All Grade: 12

Number of Students Surveyed:

220

Unintentional Injury 2010-2021

Grade 12

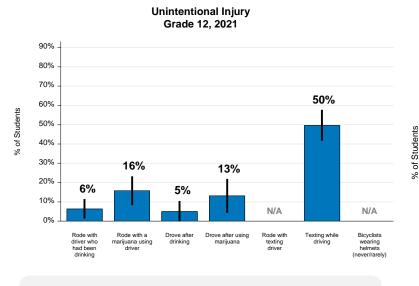

Rode with drinking driver

Background:

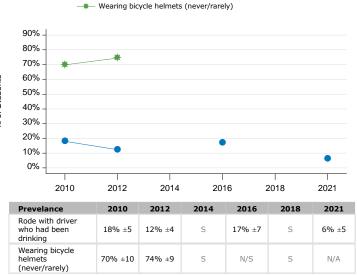

- Unintentional injury is the leading cause of death among youth. Motor vehicle crashes are the most common cause.
- Unintentional injuries are caused by behaviors such as drinking and driving, riding with a drinking driver, riding a bike or motorcycle without a helmet, or not wearing a life jacket.
- Most unintentional injuries can be prevented. Alcohol and other substances impair one's judgment and may contribute to injuries and even death.

For More Information:

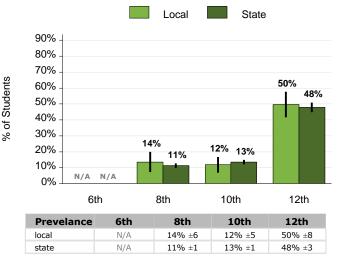

• Visit the Washington State Injury and Violence Prevention Website at: www.doh.wa.gov/DataandStatisticalReports/InjuryViolenceandPoisoning.

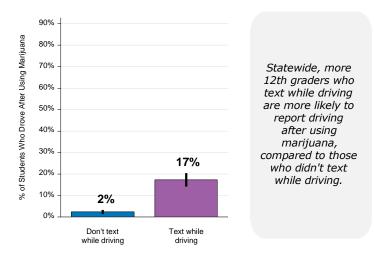

In 2021, 6% of 12th graders in our school district rode with a drinking driver.

Prevalence is displayed with 95% confidence intervals (as \pm or black bar)

Longview School District healthy survey

Washington HYS Adverse Childhood Experiences (WAH-ACEs)

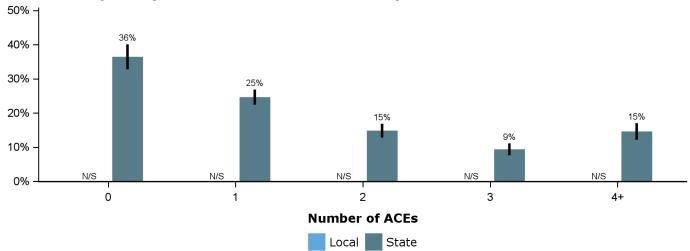

Year: 2021 Grade: 12 Sex: All

BACKGROUND

- o Adverse Childhood Experience (ACEs) are indicators of severe stressors that occur during a person's first 18 years of life. Research has shown that these adverse experiences can influence physical, mental, social, and behavioral health across the lifespan.
- o The Washington HYS ACEs Score (WAH-ACEs) assesses 11 adverse experiences that youth may report on the HYS to better assess the burden of these experiences among our state's youth.
- o WAH-ACEs can be used to understand the local levels of exposure to childhood adversity, and the relationships between these experiences and other questions on the survey.
- o WAH-ACEs is not comprehensive of all adverse experiences a child may be exposed to. For example, racism, poverty, and discrimination are examples of childhood adversity and are not included in the WAH-ACEs score.

Number of Students Surveyed: 220

o You can learn more about how the scores were developed and how they can be interpreted in the WAH-ACEs Interpretive Guide

Frequency of WAH-ACEs score compared to the state, Grade 12

NOTE: While each student can have a WAH-ACEs of 0-11, the number of students who report more than 4 adverse experiences is quite small and decreases as the score increases. To protect student privacy and reduce the amount of data that must be suppressed, we have grouped those students into a 4+ WAH-ACEs category.

Prevalence is displayed with 95% confidence intervals (as \pm or black bar |). Results generated at askhys.net on 03/15/2022

WAH-ACEs on Healthy Youth Survey

	HYS questions included in the WAH-ACEs score	District %	State %
1.	I feel safe during school (NO!/no).	14.1 (±4.8)	17.6 (±2.2)
2.	During the past 30 days, on how many days did you not go to school because you felt you would be unsafe on your way to and from school?* (Any days)	10.5 (±5.7)	9.5 (±2.0)
3.	Bullying is when one or more students threaten, spread rumors about, hit, shove, or otherwise hurt another student over and over again. It is not bullying when two students of about the same strength or power argue or fight or tease each other in a friendly way. In the last 30 days, how often have you been bullied?* (Any days)	12.6 (±4.6)	12.7 (±1.3)
4.	During the past 12 months, did someone you were dating or going out with ever limit your activities, threaten you, or make you feel unsafe in any other way?** (Yes)	6.9 (±4.7)	8.8 (±1.4)
5.	In the past 12 months, how many times did someone you were dating or going out with physically hurt you on purpose? (Count such things as being hit, slammed into something, or injured with an object or weapon.)** (Yes)	6.9 (±4.7)	3.7 (±0.9)
6.	Have you ever been in a situation where someone made you engage in kissing, sexual touch or intercourse when you did not want to? (Yes)	N/S	22.3 (±3.5)
7.	Not counting TV, movies, video games, and sporting events, have you seen an adult hit, slap, punch, shove, kick, or otherwise physically hurt another adult more than one time? (Yes)	26.3 (±8.2)	23.8 (±2.3)
8.	Has an adult ever physically hurt you on purpose (like pushed, slapped, hit, kicked or punched you), leaving a mark, bruise or injury? (Yes)	22.8 (±7.8)	20.2 (±2.1)
9.	How often does a parent or adult in your home swear at you, insult you, put you down or humiliate you? (Sometimes, Often, Very often)	29.3 (±8.4)	33.8 (±2.3)
10.	Are your current living arrangements the result of losing your home because your family cannot afford housing? (Yes)	3.8 (±2.6)	3.0 (±0.6)
11.	How often in the past 12 months did you or your family have to cut meal size or skip meals because there wasn't enough money for food? (Any times)	7.2 (±3.6)	7.6 (±1.4)

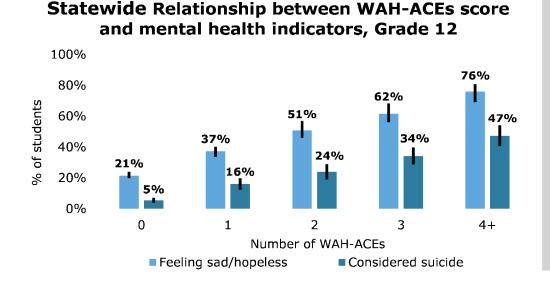

*in past 30 days, **in past 12 months

NOTE: Some students did not answer all 11 WAH-ACEs questions on the survey. To calculate their individual scores and account for those missing answers, a method called multiple imputation was used. This method also used predictors such as mother's education, sex, and race/ethnicity to estimate students' WAH-ACEs score. The percentages in the table above do not represent the imputed results used to compute the WAH-ACEs score. The results in the table match the non-imputed results in frequency reports. Learn more about how WAH-ACEs scores are created in the *WAH-ACEs Interpretive Guide*.

State Level WAH-ACEs and Key Takeaways

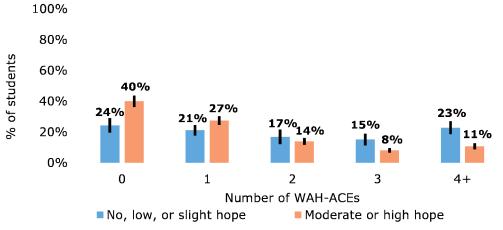

State level WAH-ACEs data highlight some important patterns among Washington students overall that also match what is in the scientific literature. Studies also indicate that students who report more adverse experiences tend to also report other negative exposures, behaviors, and outcomes. Adverse experiences do not necessarily cause these other things to happen, but they can often appear together in the same youth, making them even more likely to experience poor health and educational outcomes.

Statewide, more 12th grade students who felt sad or hopeless for at least two weeks in the past year reported higher WAH-ACEs scores.

Similarly, more 12th grade students who reported contemplating suicide reported higher WAH-ACEs scores than those who did not consider suicide.

Statewide Relationship between WAH-ACEs score and Hope Scale, Grade 12

Statewide, 12th grade students who reported more hope tended to also have a lower WAH-ACEs scores.

NOTE: Hope is the belief that the future can be better than the past and you play a role in making it so. Hope can also be taught.

Healthy weight

Underweight

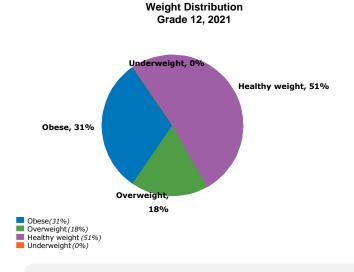

220

Background:

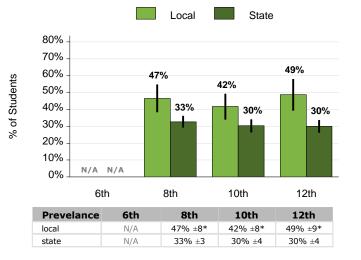

- Poor diet and physical inactivity are risk factors for obesity and overweight among youth.
- · Youth who have fewer opportunities for physical activity and increased time spent in sedentary activities such as watching television and using computers are more likely to be overweight.
- Factors that contribute to poor diet among youth include eating fewer meals at home, increased availability and affordability of unhealthy food, and increased food portion sizes.
- To be successful in increasing healthy weight among youth; governments, communities and people need to work together to create environments that support healthy diets and opportunities for physical activity.

healthy Youth Alcohol Use for Longview School District in 2021

Are OUR youth using alcohol?

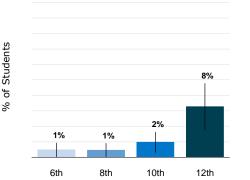

Current Drinking

Students who report drinking at least once in the past month

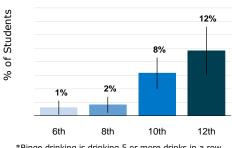

Experimental Drinking

Students who report drinking on 1-2 days in the past month, but no binge drinking

Problem or Heavy Drinking

Students who report drinking 3 or more days in the past month and/or one or more binge drinking episodes*

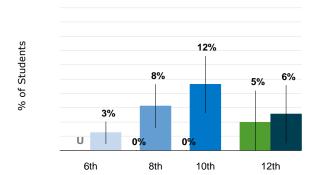

*Binge drinking is drinking 5 or more drinks in a row in the past two weeks.

In a Vehicle

Drove after drinking

Students who report drinking and driving OR riding with a driver who had been drinking

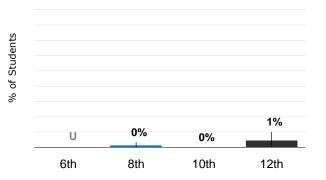

Rode with drinking driver

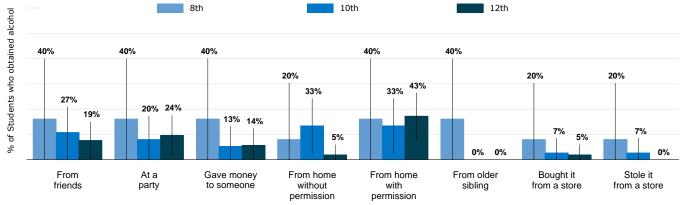

Where Do Youth Get Alcohol?

On school property

Students who report drinking on school property in the past month

The percentages in this chart are based on all students who reported getting alcohol in the past 30 days, regardless whether they reported drinking in the past 30 days. Students could select multiple sources.

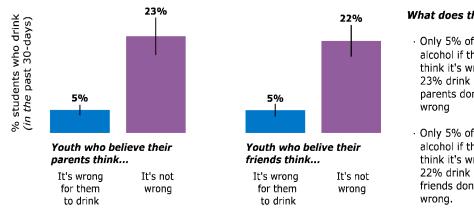

The data in these charts are based on the Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the survey.

For more results from the 2021 Healthy Youth Survey, please visit www.AskHYS.net

Prevalence is displayed with 95% confidence intervals (as black bars |). "U" indicates data is unavailable, because of too few surveys completed, questions not asked, or other reasons.

Parents and friends have influence!

Youth are less likely to drink if they believe their parents or their friends disapprove of youth drinking.

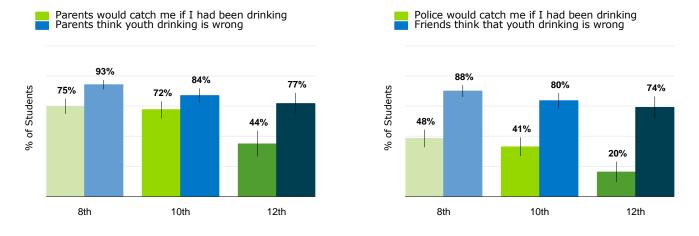

Percent of 10th Graders who Drink Alcohol (Statewide)

What does this chart say?

· Only 5% of youth drink alcohol if their parents think it's wrong, while 23% drink if their parents don't think it's

· Only 5% of youth drink alcohol if their friends think it's wrong, while 22% drink if their friends don't think it's

Youth in Longview School District reported that they believe...

Take action to reduce youth alcohol use!

Community Members - help reduce youth drinking by making it difficult for them to get alcohol. The percent of Longview School District youth who think that it would be easy to get alcohol increases as they get older, from 10% in 6th Grade to 48% in 12th Grade.

Parents - talk to your kids about the dangers of drinking alcohol.

The percent of Longview School District youth who said their parents **didn't** talk to them about the dangers of alcohol increases as they get older, from 25% in 8th Grade to 41% in 12th Grade.

Migratory Students of Longview School District

Year: 2021 Grade: 12 Sex: All Number of Students Surveyed: 220

Background

The purpose of this report is to provide stakeholders a comparative overview of the health status, behaviors, and access to healthcare coverage between self-identified migratory students of Washington State, as defined by Title I. Part C Migrant Education Program (MEP), and their non-migrant student counterparts.

The HYS data suggests that there are significantly higher health disparities among Migratory students compared to non-Migratory Washington students. Although Migratory students have access to state and federal funded healthcare coverage, there are evident gaps in accessing healthcare services that may be contributing to greater disparities overall. Other contributing factors such as higher rates of mobility due to the pursuit of temporary or seasonal agricultural work, fear of seeking services, along with other socioeconomic barriers, also impact migrant student's full academic engagement such as attendance, academic participation, and graduation.

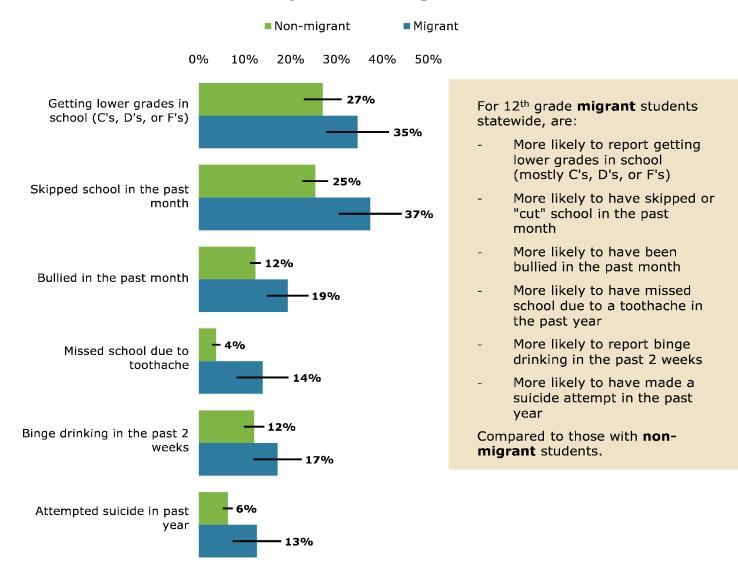

* Students self-identified as having moved independently or with family in the past 3 years to another school district or city for temporary or seasonal work in agriculture, dairy, or fishing.

FACT SHEET Migratory Students

Statewide Relationships between Migrant Status, Grade 12

FACT SHEET

Measuring Hope in Longview School District

Year: 2021

Grade: 12

Number of Students Surveyed: 220

Background

Hope is the belief that the future can be better than the past and you play a role in making it so.

Sex: All

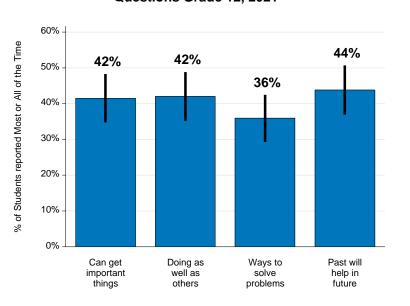

Hope is made up of goals, pathways, and agency.

Four questions from the **Children's Hope Scale** were asked on the survey.

- Two questions about **pathways**; figuring out how to get from point A to point B to reach a goal.
- Two questions about **agency/willpower**; self-efficacy & motivation to use multiple ways to reach a goal.

Adding up the results from the four questions provides overall hope scores.

- No to very low hope
- Slightly hopeful
- Moderately hopeful
- Highly hopeful

Hope Scale Component Questions Grade 12, 2021

Pathway Questions:

- I can think of many ways to get the things in life that are most important to me.
- When I have a problem, I can come up with lots of ways to solve it.

Pathways thinking is a child's belief in their capacity to find multiple ways to reach their goals.

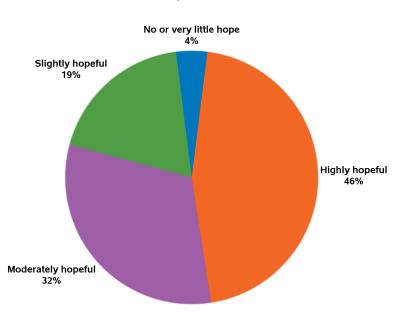

Agency Questions:

- I am doing just as well as other kids my age.
- I think the things I have done in the past will help me in the future.

Agency thinking is a child's self-efficacy and motivation to use multiple ways to reach their goal.

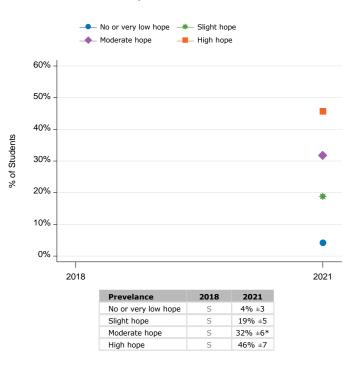

Levels of Hope Grade 12, 2021

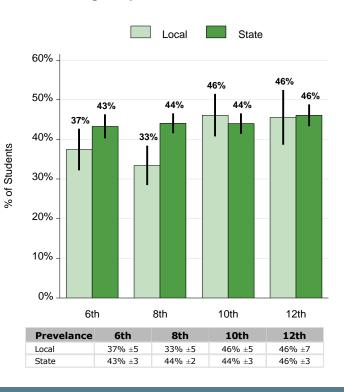

Research has shown that hope can be taught and is connected to academic achievements, well-being and positive life outcomes.

Levels of Hope 2018-2021, Grade 12

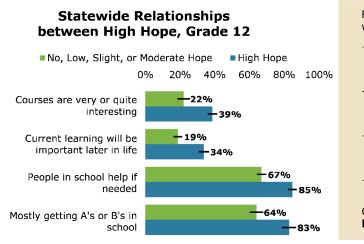

High Hope, All Grades, 2021

FACT SHEET

Measuring Hope

For 12th graders statewide, those with **high levels of hope** are:

- More likely to find courses more interesting and helpful for their future
- More likely to think the things they are learning in school will be important later in life
- More likely to report having a person at schools that could help them if needed
- More likely to report getting high grades (A's or B's)

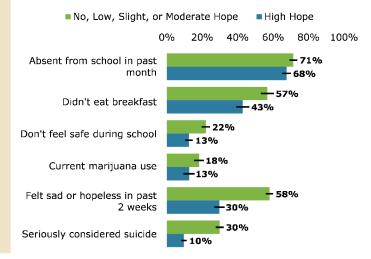

Compared to those with **lower levels of hope**.

For 12th graders statewide, those with high levels of hope are:

- Less likely to be absent from school in the past month
- Less likely to not have eaten breakfast
- Less likely to not feel safe during school
- Less likely to use marijuana in the past 30 days
- Less likely to feel sad or hopeless
- Less likely to have seriously considered suicide in the past year

Compared to those with **lower levels of hope.**

```
Number of Students Surveyed:
```

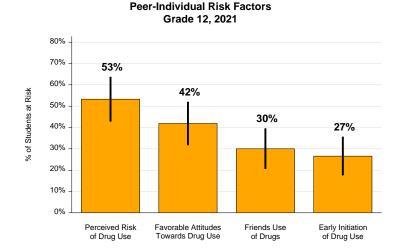

Background:

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each "factor" in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the "percent of students at risk," which is defined as the percent of students whose scores were above a risk cutpoint determined by UW researchers. We also report some of the individual questions.
- Risk factors in the peer and individual domain include attitudes youth have about substance use as well as the behaviors of their friends.

Grade: 12

```
Sex: All
```

Number of Students Surveyed: 220

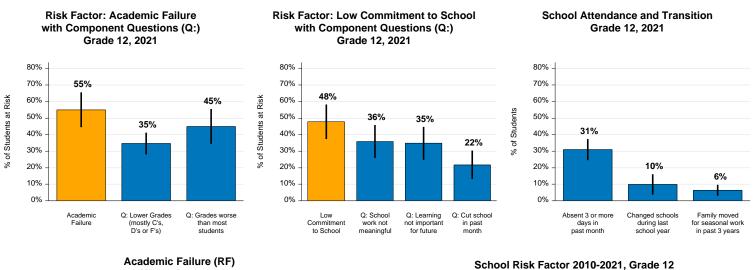

Background:

• Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse and other behaviors, by identifying risk and protective factors. (J. David Hawkins, 1992)

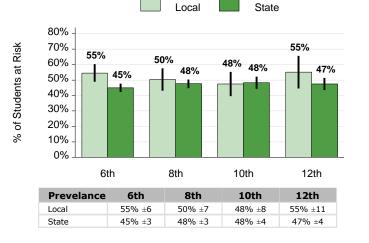

- · Risk Factor- something that may attribute to a problem.
- Protective Factor- something that helps to prevent a problem.
- Taking a close look at youth risk and protective factors can help providers select appropriate programming and interventions.

Risk and Protective Factors on the Healthy Youth Survey

Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and other behaviors, by identifying risk and protective factors.¹

- Risk Factor something that may attribute to a problem.
- **Protective Factor** something that helps to prevent a problem.

Taking a close look at youth risk and protective factors can help providers select appropriate programming and interventions.

Effective prevention focuses on reducing risk factors and strengthening protective factors. Comprehensive prevention efforts aim to ensure that protective factors outweigh risk factors at the individual, peer, family, school and community level.

Peer-Individual Risk Factors	Substance Use	Delinquency	Teen Pregnancy	School Dropout	Violence	Depression & Anxiety
Friends Who Use Drugs	~	~	~	~	✓	
Favorable Attitudes Towards Drug Use	~	~	v	~	~

✓ = Risk Factor associated with increased likelihood of health risk behavior.

FACT SHEET

Family, School, and Community Protective Factors	Substance Use	Delinquency	Risky Sexual Behavior	School Dropout	Violence	Depression & Anxiety
Opportunities for Prosocial Involvement	~	~				
Rewards for Prosocial Involvement	~	~			~	~

- = Protective Factor has a positive influence against the health risk behavior
- Each Risk and Protective factor in the Healthy Youth Survey (HYS) is measured with two or more survey questions to include multiple dimensions of the factor.
- The Fact Sheets on Risk and Protective factors for the Healthy Youth Survey (<u>https://www.askhys.net/</u><u>FactSheets</u>), refer to the "percent of students at risk," which is defined as the percent of students whose risk scores were above a certain number as determined by UW researchers.
- Data shows that youth who are not doing well academically, or who don't believe that school is important, are likely to feel less connected and committed to school.²
- Data also shows that these same youth are likely to be those who are trying drugs or experiencing depression.³
- Researchers have identified best practice, evidence and research- based programs that can decrease risk factors and promote healthy family bonding, family management, strong social supports and positive school cultures.⁴

Providing youth with multiple opportunities to learn and grow while teaching them life skills, recognizing them for who they are, teaching and promoting positive relationships in all aspects of their life, and setting clear standards can help encourage them to achieve healthy behaviors.⁵

washington state healthy yuth SURVEY

FACT SHEET APPENDIX

These are the risk and protective factor questions that were asked on the 2021 survey (<u>https://www.askhys.net/Survey</u>).

Risk Factors

Peer-Individual Risk Factors Friends Use Drugs

A peer-individual risk factor scale composed of four HYS questions.

- Think of your four best friends (the friends you feel closest to). In the past year (12 months), how many of your best friends have:
 - Smoked cigarettes?
 - Tried beer, wine, or hard liquor when their parent(s) didn't know about it?
 - Used marijuana?
 - Used LSD, cocaine, amphetamines, or other illegal drugs?

Favorable Attitudes Towards Drug Use

A peer-individual risk factor scale composed of four HYS guestions.

- How wrong do you think it is for someone your age to:
 - Drink beer, wine, or hard liquor regularly?
 - Smoke cigarettes?
 - Smoke marijuana?
 - Use LSD, cocaine, amphetamines, or another illegal drug?

Perceived Risk of Drug Use

A peer-individual risk factor scale composed of four HYS questions.

- How much do you think people risk harming themselves if they:
 - Smoke one or more packs of cigarettes per day?
 - Try marijuana once or twice?
 - Smoke marijuana regularly (at least once or twice a week)?
 - Take one or two drinks of an alcoholic beverage nearly every day?

Early Initiation of Drug Use

A peer-individual risk factor scale composed of three HYS questions.

- How old were you the first time you:
 - Used marijuana?
 - Smoked a cigarette, even just a puff?
 - Had more than a sip or two of beer, wine, or hard liquor?

Family Risk Factors Poor Family Management

A family protective scale composed of eight HYS questions.

- My parent(s) ask if I've gotten my homework done.
- Would your parent(s) know if you did not come home on time?
- When I am not at home, one of my parent(s) knows where I am and who I am with.
- The rules in my family are clear.
- My family has clear rules about alcohol and drug use.
- In you drank some beer, wine, or liquor without your parent(s)'s permission, would you be caught by them?
- If you carried a handgun without your parent(s)'s permission, would you be caught by them?
- If you skipped school, would you be caught by your parent(s)'s?

Parental Attitudes Favorable Towards Drug Use

A family risk factor scale composed of three HYS questions.

- How wrong do your parent(s) feel it would be for you to:
 - Drink beer, wine, or hard liquor regularly (at least once or twice a month)?
 - Smoke cigarettes?
 - Use marijuana?

School Risk Factors

Academic Failure

A school risk factor scale composed of two HYS questions.

- Putting them all together, what were your grades like last year?
- Are your school grades better than the grades of most students in your class?

Low Commitment to School

A school risk factor scale composed of seven HYS questions.

- How often do you feel the schoolwork you are assigned is meaningful and important?
- How interesting are most of your courses to you?
- How important do you think the things you are learning in school are going to be for you later in life?
- Think back over the past year in school. How often did you: Enjoy school?
- Think back over the past year in school. How often did you: Dislike school?
- Think back over the past year in school. How often did you: Try to do your best work in school?
- During the LAST 4 WEEKS, how many whole days of school have you missed because you skipped or "cut"?

FACT SHEET APPENDIX

Community Risk Factors

Perceived Availability of Drugs

A community risk factor scale composed of four HYS questions.

- If you wanted to get some beer, wine, or hard liquor, how easy would it be for you to get some?
- If you wanted to get some cigarettes, how easy would it be for you to get some?
- If you wanted to get some marijuana, how easy would it be for you to get some?
- If you wanted to get a drug like cocaine, LSD, or amphetamines, how easy would it be for you to get some?

Perceived Availability of Handguns

 If you wanted to get a handgun, how easy would it be for you to get one?

Laws and Norms Favorable to Drug Use

A community risk factor scale composed of six HYS questions.

- How wrong would most adults in your neighborhood think it was for kids your age:
 - To use marijuana?
 - To drink alcohol?
 - To smoke cigarettes?
- If a kid drank some beer, wine, or hard liquor in your neighborhood or community, would they be caught by the police?
- If a kid carried a handgun in your neighborhood would they be caught by the police?
- If a kid used marijuana in your neighborhood or community, would they be caught by the police?

Low Neighborhood Attachment

A community risk factor scale composed of three HYS questions:

- I'd like to get out of my neighborhood or community.
- If I had to move, I would miss the neighborhood or community I now live in.
- I like my neighborhood / community.

Protective Factors

Family Protective Factors

Opportunities for Prosocial Family Involvement

A family protective scale composed of three HYS questions.

- If I had a personal problem, I could ask parent(s) for help.
- My parent(s) give me lots of chances to do fun things with them.
- My parent(s) ask me what I think before most family decisions affecting me are made.

Rewards for Prosocial Family Involvement

A family protective scale composed of four HYS questions only asked to 6th graders on Form C (<u>https://www.askhys.net/Docs/</u><u>HYS%202021%20Form%20C%20e-survey%20_Final.pdf</u>).

- My parent(s) notice when I am doing a good job and let me know about it.
- How often do your parent(s) tell you they're proud of you for something you've done?
- Do you enjoy spending time with your mom(s)?
- Do you enjoy spending time with your dad(s)?

School Protective Factors

Opportunities for Prosocial School Involvement

A school protective factor scale composed of five HYS questions:

- In my school, students have lots of chances to help decide things like class activities and rules.
- There are lots of chances for students in my school to talk with a teacher one-on-one.
- Teachers ask me to work on special classroom projects.
- There are lots of chances for students in my school to get involved in sports, clubs, and other school activities outside of class.
- I have lots of chances to be part of class discussions or activities.

Rewards for Prosocial School Involvement

A school protective factor scale composed of four HYS questions:

- My teacher(s) notices when I am doing a good job and lets me know about it.
- The school lets my parent(s) know when I have done something well.
- I feel safe at my school.
- My teachers praise me when I work hard in school.

Community- Protective Factors

Opportunities for Prosocial Community Involvement

A community protective factor scale that includes four HYS questions.

- There are adults in my neighborhood or community I could talk to about something important.
- Which of the following activities for people your age are available in your neighborhood or community?
 - Sports teams and recreation
 - Scouts, Camp Fire, 4-H Clubs, or other service clubs
 - Boys and Girls Club, YMCA, or other activity clubs

Rewards for Prosocial Community Involvement

A community protective factor scale that includes three HYS questions; only asked to 6th graders on Form C (<u>https://www.askhys.net/Docs/HYS%202021%20Form%20C%20e-survey%20_Final.pdf</u>).

- My neighbors notice when I am doing a good job and let me know.
- There are people in my neighborhood or community who encourage me to do my best.
- There are people in my neighborhood or community who are proud of me when I do something well.
