

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

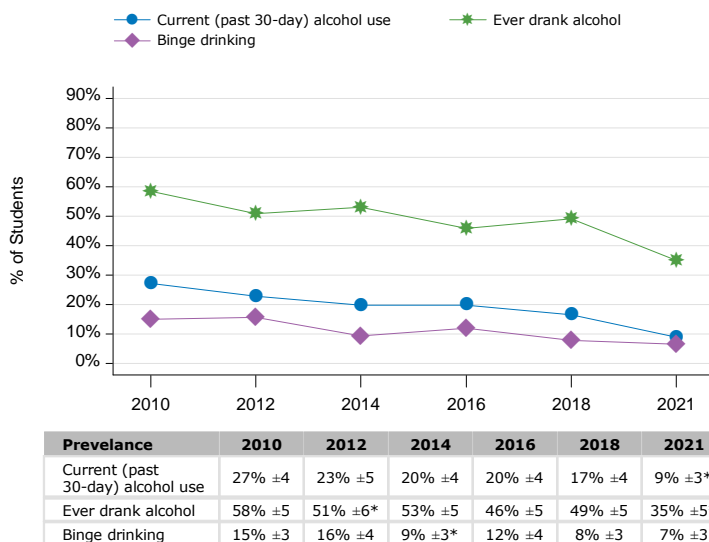

Background:

- Youth alcohol use is associated with violence, poor school performance, suicide, and risky sexual behavior.
- Research shows that heavy alcohol use during teen years can permanently damage the still-developing brain.

Current (past 30 days) Alcohol Use Compared to the State, All Grades, 2021

Alcohol Use 2010-2021, Grade 10

Level of Alcohol Use Grade 10, 2021

Statewide Relationship between Considering Suicide and Current (past 30-day) Alcohol Use Grade 10, 2021

Statewide, more 10th graders who drink alcohol report seriously considering suicide compared to those who don't drink.

Where Do Youth Get Alcohol? Grade 10, 2021

The percentages in this chart are based on all students who reported getting alcohol in the past 30 days, regardless of whether they reported drinking in the past 30 days. Students could select multiple sources.

**Youth Perceptions about Alcohol
Compared to the State, Grade 10, 2021**

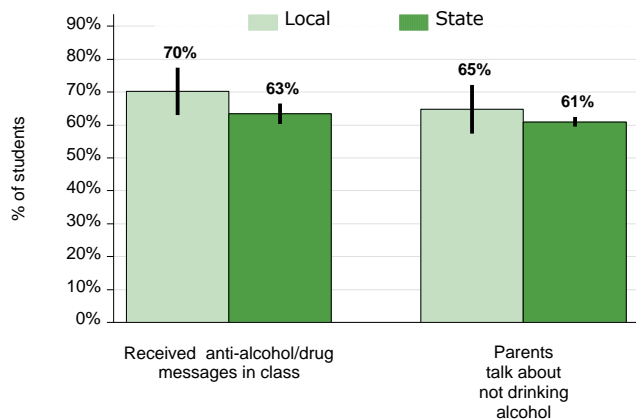

Prevalence	Adults frown on kids drinking	Regular drinking is risky	Drinking is wrong for kids	Police would catch youth drinking
Local	N/A	71% ±7	73% ±7	41% ±8
State	N/A	78% ±2	68% ±3	30% ±2

**Drinking and Driving/Riding
Compared to the State, Grade 10, 2021**

Prevalence	Drove after drinking	Rode with driver who had been drinking
Local	0% ±0	12% ±5
State	1% ±1	10% ±1

**Received Anti-Alcohol Messages
Compared to the State, Grade 10, 2021**

Prevalence	Received anti-alcohol/drug messages in class	Parents talked about drinking
Local	70% ±7	65% ±7
State	63% ±3	61% ±1

**Youth Perception that Alcohol is Easy to Get
Compared to the State, All Grades, 2021**

Prevalence	6th	8th	10th	12th
Local	10% ±3	24% ±6	32% ±7*	48% ±10
State	13% ±1	25% ±2	41% ±3	54% ±3

For More Information:

- Parents, schools, and communities can work together to keep youth healthy and safe. For prevention tips and to connect with a prevention coalition in your area, visit www.StartTalkingNow.org.
- For free printed guides on preventing alcohol and other drug use, visit the ADAI Clearinghouse <http://adaiclearinghouse.net> or call (206) 221-8325.
- For 24 hour help for mental health, substance abuse and problem gambling, call 1-866-789-1511 or visit www.waRecoveryHelpLine.org.

Year: 2021

Grade: 12

Sex: All

Number of Students Surveyed: 220

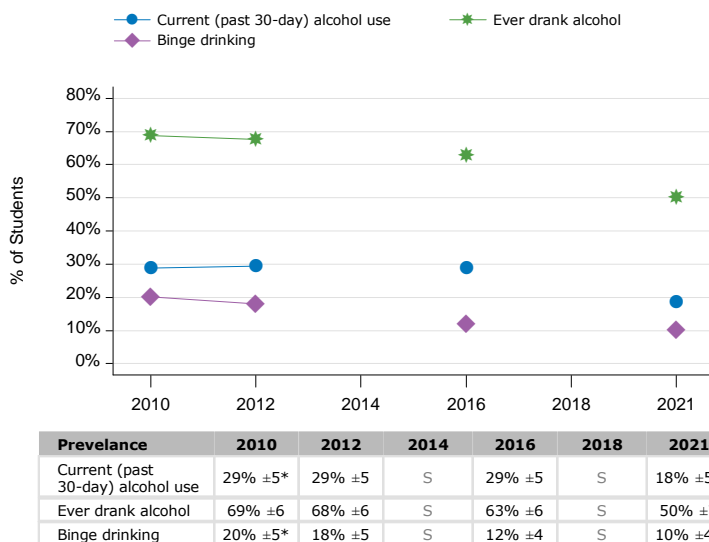

Background:

- Youth alcohol use is associated with violence, poor school performance, suicide, and risky sexual behavior.
- Research shows that heavy alcohol use during teen years can permanently damage the still-developing brain.

Current (past 30 days) Alcohol Use Compared to the State, All Grades, 2021

Alcohol Use 2010-2021, Grade 12

Level of Alcohol Use Grade 12, 2021

Statewide Relationship between Considering Suicide and Current (past 30-day) Alcohol Use Grade 12, 2021

Statewide, more 12th graders who drink alcohol report seriously considering suicide compared to those who don't drink.

Where Do Youth Get Alcohol? Grade 12, 2021

The percentages in this chart are based on all students who reported getting alcohol in the past 30 days, regardless of whether they reported drinking in the past 30 days. Students could select multiple sources.

Youth Perceptions about Alcohol Compared to the State, Grade 12, 2021

Prevalence	Adults frown on kids drinking	Regular drinking is risky	Drinking is wrong for kids	Police would catch youth drinking
Local	N/A	77% ±9	48% ±10	20% ±8
State	N/A	81% ±2	47% ±5	22% ±2

Drinking and Driving/Riding Compared to the State, Grade 12, 2021

Prevalence	Drove after drinking	Rode with driver who had been drinking
Local	5% ±6	6% ±5
State	4% ±1	8% ±1

Received Anti-Alcohol Messages Compared to the State, Grade 12, 2021

Prevalence	Received anti-alcohol/drug messages in class	Parents talked about drinking
Local	47% ±10	46% ±10
State	48% ±2	55% ±2

Youth Perception that Alcohol is Easy to Get Compared to the State, All Grades, 2021

Prevalence	6th	8th	10th	12th
Local	10% ±3	24% ±6	32% ±7*	48% ±10
State	13% ±1	25% ±2	41% ±3	54% ±3

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each "factor" in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the "percent of students protected," which is defined as the percent of students whose scores were above a protection cutpoint determined by UW researchers. We also report some of the individual questions.
- *Protective factors in the community environment are those that offer the youth opportunities and rewards for participating in positive and healthy activities.*

For More Information:

Washington HYS results generated at AskHYS.net on 03-15-2022

Missing codes: S = result suppressed due to insufficient reporting from students of schools; N/G = grade not available; N/S = question was not surveyed this year; N/A = question was not asked of this grade.

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Parents are one of the primary influences on their children's decision to use alcohol, tobacco, and other drugs.
- Brain development in young adulthood continues into the mid-20s. Developing brains are more susceptible to the effects of alcohol and other drugs.

For More Information:

- Parents, schools, and communities can work together to keep youth healthy and safe. For prevention tips and to connect with a prevention coalition in your area, visit www.StartTalkingNow.org.
- For free printed guides on preventing alcohol and other drug use, visit the ADAI Clearinghouse <http://adaiclearinghouse.net> or call (206) 221-8325.
- For 24 hour help for mental health, substance use and problem gambling, call 1-866-789-1511 or visit www.waRecoveryHelpLine.org.

**Current (past 30-day) Substance Use
Grade 10, 2021**

Most youth don't use alcohol or other substances.

Current (past 30-day) All Other Illegal Drug Use*
Compared to the State, All Grades, 2021**

Current (past 30-day) Substance Use 2010-2021, Grade 10

Prevalence	2010	2012	2014	2016	2018	2021
Cigarettes	12% ±3	10% ±3	7% ±3	8% ±3	8% ±3	2% ±1*
Alcohol	27% ±4	23% ±5	20% ±4	20% ±4	17% ±4	9% ±3*
Marijuana	20% ±4	17% ±4	17% ±4	18% ±4	13% ±4	8% ±3
Rx Pain killers to get high	8% ±3	6% ±3	4% ±2	5% ±2	1% ±1*	1% ±1
All other illegal drug use***	5% ±2	5% ±2	2% ±2	6% ±4	2% ±2	1% ±1

**Statewide Relationship between
Lower Grades and Current (past 30-day)
All Other Illegal Drug Use***
Grade 10, 2021**

Statewide, more 10th graders who use illegal drugs (not including alcohol, tobacco or marijuana) report lower grades in school (C's, D's or F's) compared to those who don't use.

**Over-the-counter drug use is the use of drugs like cough syrup or cold medicine for non-medical purposes.

***All other illegal drug use includes prescription drugs not prescribed, Rx pain killers to get high, and all other illegal drugs; but does not include alcohol, tobacco or marijuana.

Prevalence is displayed with 95% confidence intervals (as ± or black bar)

Washington HYS results generated at AskHYS.net on 03-15-2022

Depressive Feelings...

Students who report feeling sad or hopeless for at least two weeks in the past year

Support...

Students who report they have an adult to turn to when they feel sad or hopeless

For help and information about what you can do, contact:

- National Suicide Prevention Lifeline: 1-800-273-TALK (8225) or www.suicidepreventionlifeline.org
- For help, text "HOME" to 741741 for a 24/7, free, confidential crisis counselor or call 1-800-TEENLINK (833-6546) to speak with a caring teen.

The data in these charts are based on the State of Washington's Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the anonymous survey.

Suicidal Feelings and Actions...

Students who report considering suicide, making a suicide plan, and attempting suicide in the past year

Feeling Anxious and not able to Stop Worrying...

Students who report feeling nervous, anxious or over the edge or not being able to stop or control worrying in the past 2 weeks

YOU can save a life:

- Take it Seriously
- Understand the risk factors and watch for the warning signs (<https://afsp.org/about-suicide/risk-factors-and-warning-signs>).
- Emphasize, don't rationalize. Show you care. "I'm worried about you" or "I want to help you".
- Ask if they are thinking about killing themselves.
- Get help. Don't keep it a secret!

For immediate help call
1-800-273-TALK
1-866-4-U-TREVOR (GLBTQ)

Dietary Behaviors for Longview School District

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- A nutritious diet can reduce major risk factors for chronic disease such as obesity, high blood pressure, diabetes, and high blood cholesterol.
- Poor nutrition has the potential to affect the growth, development, health status and academic achievement of children and adolescents.
- Individual food choices are made within the context of the family and the community.
- In order to be able to choose a nutritious diet, an affordable supply of healthy foods must be available.

For More Information:

- Visit the Washington State Healthy Eating Active Living Program website: www.doh.wa.gov.

**Dietary Behaviors
Grade 10, 2021**

In 2021, 39% of 10th graders in our school district don't usually eat dinner with their family.

**Does Not Usually Eat Dinners with Family
Compared to the State, All Grades, 2021**

Dietary Behavior 2010-2021, Grade 10

Prevalence	2010	2012	2014	2016	2018	2021
Eats <5 fruits/vegs daily	N/S	78% ± 7	85% ± 5	83% ± 6	89% ± 5	81% ± 6
Does not usually eat dinners w/ family	44% ± 7	41% ± 8	41% ± 7	47% ± 8	46% ± 8	39% ± 7
Drink sweetened drinks daily at school**	22% ± 6	12% ± 5*	5% ± 3*	7% ± 4	2% ± 2	2% ± 2
Did not eat breakfast yesterday	N/S	N/S	45% ± 8	45% ± 8	52% ± 8	54% ± 7

**Statewide Relationship between
Lower Grades and Food Insecurity
Grade 10, 2021**

Statewide, more 10th graders who report experiencing food insecurity also report lower grades in school (C's, D's or F's) compared to other youth.

** In 2021, the definition of sugar-sweetened and sugar-free drinks expanded to include additional examples compared to those provided in previous surveys.

Prevalence is displayed with 95% confidence intervals (as ± or black bar)

Missing codes: S = result suppressed due to insufficient reporting from students of schools; N/G = grade not available; N/S = question was not surveyed this year; N/A = question was not asked of this grade.

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each "factor" in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the "percent of students protected," which is defined as the percent of students whose scores were above a protection cutpoint determined by UW researchers. We also report some of the individual questions.
- *Protective factors in the family environment are those that encourage positive participation in the family setting, and reward youth for that involvement.*

Prevalence	2010	2012	2014	2016	2018	2021
Opportunities	0% ± 0	54% ± 9	54% ± 5	53% ± 5	58% ± 7	36% ± 5*
Rewards	0% ± 0	52% ± 9	53% ± 6	51% ± 5	56% ± 7	33% ± 5*

Parental Protective Influences, Grade 6, 2021

Prevalence is displayed with 95% confidence intervals (as ± or black bar)

*indicates a significant change from the previous year or a significant difference between state and local results, p<0.05

Washington HYS results generated at AskHYS.net on 03-15-2022

Missing codes: S = result suppressed due to insufficient reporting from students of schools; N/G = grade not available; N/S = question was not surveyed this year; N/A = question was not asked of this grade.

Year: 2021

Grade: 8

Sex: All

Number of Students Surveyed: 403

Background:

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each “factor” in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the “percent of students protected,” which is defined as the percent of students whose scores were above a protection cutpoint determined by UW researchers. We also report some of the individual questions.
- *Protective factors in the family environment are those that encourage positive participation in the family setting, and reward youth for that involvement.*

The data in these charts are based on the Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the survey.

For more results from the 2021 Healthy Youth Survey, please visit www.AskHYS.net

Background:

- Marijuana can be addictive. Most teens who enter drug treatment programs report marijuana is the main drug they use.
- If teens use marijuana, anxiety and depression can get worse. Marijuana use is associated with risk of anxiety and depression.
- Teens who use marijuana can have problems with learning and memory and are more likely to do poorly in school.

Lifetime Marijuana Use

"I have used marijuana at least once."

Current (past 30-day) Marijuana Use

"I have used marijuana at least once in the past month."

Heavy Marijuana Use

"I have used marijuana on 10 or more days in the past month."

Marijuana is Perceived as Easy or Very Easy to Get

Marijuana is Perceived as Not Harmful

*"Smoked" regularly changed to "Used" regularly in 2014

Parental discussion about not using marijuana

Parents think youth marijuana use is wrong

Peers think youth marijuana use is wrong

Youth think marijuana use is wrong for youth their age

Police would catch me if I used marijuana

Marijuana use on school property in past month

Relationship between marijuana use and perceived parental and peer norms, Grade 10, 2021

10th

% students who use marijuana (in the past 30-days)

Youth who believe their parents think...

It's wrong for them to use

It's not wrong

Youth who believe their friends think...

It's wrong for them to use

It's not wrong

What does this chart say?

- Statewide, 10th graders are less likely to use marijuana if they believe their parents think it's wrong for them to use.
- Statewide 10th graders are less likely to use marijuana if they believe their friends think it's wrong for them to use.

Tips for parents and guardians to help teens avoid alcohol, marijuana and other drugs

- Talk early and often about the risks. Get tips for how to talk with your child and stay better connected at www.StartTalkingNow.org.
- Set clear rules against alcohol and drug use, and enforce reasonable consequences.
- Stay involved in your child's life: eat dinner together, know who their friends are, keep track of what they are doing.
- Be aware of the signs and take action if you think your teen is using. Talk to your school's counselor, or get information about other resources in your area by calling the Washington Recovery Help Line at 1-866-789-1511.
- For 24 hour help for mental health, substance use or misuse and problem gambling, call 1-866-789-1511 or visit www.waRecoveryHelpLine.org.

Where Do Youth Get Marijuana?

The percentages in this chart are based on all students who reported getting marijuana in the past 30 days, regardless whether they reported using in the past 30 days. Students could select multiple sources.

Type of Marijuana Use, among Current Marijuana Users

Marijuana Use and Riding/Driving

Statewide Relationship between Regular* Marijuana Use and Living with a Marijuana User, Grade 10, 2021

Statewide, more 10th graders who live with a marijuana user report regular* marijuana use compared to those who don't live with someone who uses marijuana.

*Regular marijuana use is defined as use on 6 or more days in the past 30 days.

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Marijuana can be addictive. Most teens who enter drug treatment programs report marijuana is the primary drug they use.
- If teens use marijuana, anxiety and depression can get worse. Marijuana use is associated with risk of anxiety and depression.
- Teens who use marijuana can have problems with learning and memory and are more likely to fail in school.

Longview School District Mental Health and Well-being

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background

- Suicide is the second leading cause of death for Washington teens 15-19 years old.
- Most youth suicides occur at home.
- Depression is a common yet treatable condition and many people with depression need treatment to get better. Depression can

include feelings of sadness, helplessness, and hopelessness that linger over time. Depression can occur along with substance use and thoughts of suicide. (Teen Depression, National Institute of Mental Health www.nimh.nih.gov)

Mental Health Indicators, Grade 10, 2021

In 2021, 37% of 10th graders in our school district felt so sad or hopeless for two weeks or more that they stopped doing their usual activities

missing codes

S = result suppressed due to insufficient reporting from students of schools;
N/G = grade not available; N/S = question was not surveyed this year;
N/A = question was not asked of this grade;

prevalence is displayed with 95% confidence intervals (a± or black bar |)

**Alone or in combination with other race/ethnicities.*

Statewide relationship between feeling sad/hopeless and interpersonal violence, Grade 10, 2021

Statewide relationship between considering suicide and Hope Scale, Grade 10, 2021

Statewide, students with moderate or high hope are less likely to report considering suicide in the past year compared to students with no or low hope.

NOTE: Hope is the belief that the future can be better than the past and you play a role in making it so. Hope can also be taught.

Longview School District Mental Health and Well-being

Year: 2021

Grade: 12

Sex: All

Number of Students Surveyed: 220

Background

- Suicide is the second leading cause of death for Washington teens 15-19 years old.
- Most youth suicides occur at home.
- Depression is a common yet treatable condition and many people with depression need treatment to get better. Depression can

include feelings of sadness, helplessness, and hopelessness that linger over time. Depression can occur along with substance use and thoughts of suicide. (Teen Depression, National Institute of Mental Health www.nimh.nih.gov)

Mental Health Indicators, Grade 12, 2021

In 2021, 42% of 12th graders in our school district felt so sad or hopeless for two weeks or more that they stopped doing their usual activities

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Regular physical activity reduces rates of obesity and serious diseases, helps people maintain a healthy body weight and improves quality of life.
- The Centers for Disease Control and Prevention recommends that children and adolescents participate in at least 60 minutes of physical activity daily, and muscle strengthening exercises 3 days a week.
- Increased time spent in recreational screen time, such as watching TV, playing video games, using a computer for fun, or cell phone usage, means less time for students to be physically active.
- Many social and environmental factors influence the decision to be active. Successful strategies to promote physical activity include educating individuals and developing policies in schools and communities to create environments that support being physically active.

For More Information:

- Visit the Washington State Healthy Eating Active Living Program website: www.doh.wa.gov.
- Visit the National Physical Activity Plan: www.physicalactivityplan.org.
- Visit CDC Physical activity guidelines: www.cdc.gov/physicalactivity/everyone/guidelines/children.html.
- Note: DOH advocates using the CDC recommendations of 'at least 60 minutes of physical activity daily.'

**Physical Activity
Grade 10, 2021**

In 2021, 79% of 10th graders in our school district did not meet the recommendations for 60 minutes of physical activity 7 days a week.

Physical Activity 2014-2021, Grade 10

Prevalence	2014	2016	2018	2021

Background:

- Prescription drug misuse is when someone takes a medication that was prescribed for someone else or takes their own prescription in a way not intended by a doctor---like to stay awake, or "to get high".
- Prescription drugs that affect the brain, including opioid pain killers, stimulants, and depressants, may cause physical dependence that can turn into addiction.
- Most teens get prescription drugs they misuse and use from friends and relatives, sometimes without the person knowing.
- Prescription drug misuse has become an important health issue, particularly the danger of misusing prescription pain medications. Each year, there continues to be more overdose deaths than deaths from motor vehicle crashes (CDC National Center for Health Statistics).

What can parents or caregivers do to prevent teen prescription misuse?

- Talk to your children about what you do to stay healthy, and, if you use medications, why they are safe for your personal use and not for them.
- Talk to your teen about the dangers of prescription drug misuse. Learn more at www.medicineabuseproject.org.
- Keep the most commonly misused prescription drugs (painkillers, sedatives and stimulants) in a lock box.
- Take steps to safeguard the most commonly misused prescription drugs (painkillers, sedatives, and stimulants) in your home: monitor their use, keep them in a lock box, and properly dispose of unused or expired medications.

For More Information:

- Learn more at www.drugfree.org.
- For 24 hour help for mental health, substance use or misuse and problem gambling, call 1-866-789-1511 or visit www.waRecoveryHelpLine.org.
- For medication disposal locations, see www.takebackyourmeds.org.

Student Misuse of Painkillers (in last 30 days)

Students who report using painkillers* to get high at least once in the past month

*painkillers like Vicodin, OxyContin (sometimes called Oxy or OC) or Percocet (sometimes called Percs)

Students Misuse of Someone Else's Prescription (in last 30 days)

Students who report using prescription drugs not prescribed to them in the past month

When students are asked about the use of prescription drugs that are not prescribed for them... their perceptions are:

My parents would think it was wrong if I used prescription drugs not prescribed for me

My friends would think it was wrong if I used prescription drugs not prescribed for me

I risk harming myself if I use prescription drugs that are not prescribed for me

For more results from the 2021 Healthy Youth Survey, please visit www.AskHYS.net

The data in these charts are based on the Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the survey.

Bullied at school*...

Students who report they were bullied at school in the past month

Not feeling safe...

Students who report they did not feel safe at school

Missing school due to safety...

Students who report not going to school because they did not feel safe

For more results from the 2021 Healthy Youth Survey, please visit www.AskHYS.net

Harassment...

Students who report being harassed or bullied at school due to their perceived sexual orientation or race or by a computer or cell phone in the past month

Weapon carrying...

Students who report they carried a weapon on school property in the past month

For more information about bullying prevention and school safety, visit:

- Office of Superintendent of Public Instruction's School Safety Center: www.k12.wa.us/safetycenter

The data in these charts are based on the Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the survey.

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Comprehensive Sexual Health Education is required for all students in grades 4-12, by the 2022-23 school year. Districts must ensure sexual health education follows requirements of RCW 28A.300.475 and other relevant state laws: <https://www.k12.wa.us/student-success/resources-subject-area/sexual-health-education>
- Washington Health Education K-12 Learning Standards provide guidance to districts, schools and teachers with grade-level outcomes related to sexual health education: www.k12.wa.us/HealthFitness/Standards.aspx.
- Evidence-based programs can significantly delay first intercourse, decrease sexual risk taking, and increase condom and contraceptive use: <https://www.cdc.gov/healthyouth/whatworks/what-works-sexual-health-education.htm>.

For More Information:

- Contact Sexual Health Education, Office of Superintendent of Public Instruction: <https://www.k12.wa.us/student-success/resources-subject-area/sexual-health-education>

Questions about sexual behavior, orientation and gender were included at the discretion of each school district. Therefore, local results may be missing or may not reflect a representative sample of all students in the community. In order to improve the quality and usefulness of data, it is recommended that all schools include these questions when administering the Healthy Youth Survey.

Sexual Behaviors
Grade 10, 2021**

Longview School District

Healthy Youth Survey

COMMERCIAL TOBACCO PRODUCT USE

Fact Sheet

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

BACKGROUND

- Tobacco use remains the leading cause of preventable death and disease in Washington.
- Preventing youth initiation of tobacco and other nicotine use is critical to stem the tide of tobacco-related mortality, morbidity, and economic costs.
- Youth and young adults under age 18 are far more likely to start using tobacco than adults; nearly 9 out of 10 adults who smoke started by age 18.
- 104,000 Washington youth alive today will ultimately die prematurely from smoking.
- The emergence of vapor products (also called electronic cigarettes) has raised serious concern. Nicotine use can adversely affect brain development.
- The effects of nicotine exposure during youth and young adulthood can be long-lasting and can include lower impulse control and mood disorders. The nicotine in vapor products can prime young brains for tobacco use and addiction to other drugs.

Current (past 30-day) use trends, grade 10

Prevalence	2010	2012	2014	2016	2018	2021
cigarettes	12% ±3	10% ±3	7% ±3	8% ±3	8% ±3	2% ±1*
smokeless tobacco	7% ±3	5% ±2	1% ±2*	4% ±3	1% ±2	1% ±1
vapor products	N/S	N/S	16% ±5	14% ±5	18% ±6	11% ±3

Statewide current [past 30 day] vapor product use and race/ethnicity, grade 10

**Non-Hispanic

Among 10th grade students, vaping varies by race and ethnicity. The highest rate of vaping is reported among Non-Hispanic Native Hawaiian/Pacific Islander students and the lowest is among Non-Hispanic Asian students. However, rates for some of these race/ethnicity sub-groups can vary widely.

results generated at www.askhys.net on 03/15/2022

- Vapor products are the most common nicotine product used by youth.
- Youth and young adults under age 18 are far more likely to start tobacco use than adults: 4 out of 5 smokers started during adolescence. According to the U.S. Surgeon General, there is a strong association between the use of e-cigarettes, cigarettes, and the use of other burned tobacco products by young people.
- The minimum age of purchase for tobacco and vapor products is 21, but youth can get these products from their older friends and classmates.
- In 2016, Washington State passed a Vapor Products law, establishing a statewide licensing system and important protections to reduce illegal youth access to vapor products. This law applies to any vapor product, whether or not it contains nicotine.

Current (past 30-day) vapor product use compared to the state, all grades

Reported substance "vaped" among current (30-day) vapor product users, Grade 10

*Students can select more than one type of substance

Statewide prevalence of past 30 day e-cigarette, cigarette, and use of both among youth by grade

Source of tobacco and vapor products among those who use them, Grade 10

**Social sources include: giving money to someone, "bumming", from a person 18 or older, and taking from a store or family. Non-social sources include buying from a store, the internet, or a vending machine.

Unintentional Injury for Longview School District

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Unintentional injury is the leading cause of death among youth. Motor vehicle crashes are the most common cause.
- Unintentional injuries are caused by behaviors such as drinking and driving, riding with a drinking driver, riding a bike or motorcycle without a helmet, or not wearing a life jacket.
- Most unintentional injuries can be prevented. Alcohol and other substances impair one's judgment and may contribute to injuries and even death.

For More Information:

- Visit the Washington State Injury and Violence Prevention Website at: www.doh.wa.gov/DataandStatisticalReports/InjuryViolenceandPoisoning.

Unintentional Injury
Grade 10, 2021

In 2021, 12% of 10th graders in our school district rode with a drinking driver.

Unintentional Injury 2010-2021
Grade 10

Prevalence	2010	2012	2014	2016	2018	2021
Rode with driver who had been drinking	19% ± 4	20% ± 4	19% ± 6	14% ± 5	12% ± 5	12% ± 5
Wearing bicycle helmets (never/rarely)	73% ± 7	68% ± 9	N/S	N/S	N/A	N/A

Texting While Driving, among Those Who Drove
Compared to the State, All Grades, 2021

Prevalence	6th	8th	10th	12th
local	N/A	14% ± 6	12% ± 5	50% ± 8
state	N/A	11% ± 1	13% ± 1	48% ± 3

Statewide Relationship between
Texting While Driving and
Driving After Using Marijuana
Grade 10, 2021

Statewide, more 10th graders who text while driving are more likely to report driving after using marijuana, compared to those who didn't text while driving.

Unintentional Injury for Longview School District

Year: 2021

Grade: 12

Sex: All

Number of Students Surveyed: 220

Background:

- Unintentional injury is the leading cause of death among youth. Motor vehicle crashes are the most common cause.
- Unintentional injuries are caused by behaviors such as drinking and driving, riding with a drinking driver, riding a bike or motorcycle without a helmet, or not wearing a life jacket.
- Most unintentional injuries can be prevented. Alcohol and other substances impair one's judgment and may contribute to injuries and even death.

Washington HYS Adverse Childhood Experiences (WAH-ACEs)

Year: 2021 Grade: 10 Sex: All Number of Students Surveyed: 352

BACKGROUND

- o Adverse Childhood Experience (ACEs) are indicators of severe stressors that occur during a person's first 18 years of life. Research has shown that these adverse experiences can influence physical, mental, social, and behavioral health across the lifespan.
- o The Washington HYS ACEs Score (WAH-ACEs) assesses 11 adverse experiences that youth may report on the HYS to better assess the burden of these experiences among our state's youth.
- o WAH-ACEs can be used to understand the local levels of exposure to childhood adversity, and the relationships between these experiences and other questions on the survey.
- o WAH-ACEs is not comprehensive of all adverse experiences a child may be exposed to. For example, racism, poverty, and discrimination are examples of childhood adversity and are not included in the WAH-ACEs score.
- o You can learn more about how the scores were developed and how they can be interpreted in the [WAH-ACEs Interpretive Guide](#)

Frequency of WAH-ACEs score compared to the state, Grade 10

NOTE: While each student can have a WAH-ACEs of 0-11, the number of students who report more than 4 adverse experiences is quite small and decreases as the score increases. To protect student privacy and reduce the amount of data that must be suppressed, we have grouped those students into a 4+ WAH-ACEs category.

Missing Codes

S = result suppressed due to insufficient reporting

Prevalence is displayed with 95% confidence intervals (as ± or black bar |).

WAH-ACEs on Healthy Youth Survey

HYS questions included in the WAH-ACEs score	District %	State %
1. I feel safe during school (NO!/no).	17.7 (±4.1)	17.0 (±2.1)
2. During the past 30 days, on how many days did you not go to school because you felt you would be unsafe on your way to and from school?* (Any days)	10.5 (±4.6)	8.3 (±1.5)
3. Bullying is when one or more students threaten, spread rumors about, hit, shove, or otherwise hurt another student over and over again. It is not bullying when two students of about the same strength or power argue or fight or tease each other in a friendly way. In the last 30 days, how often have you been bullied?* (Any days)	17.5 (±4.1)	13.3 (±1.4)
4. During the past 12 months, did someone you were dating or going out with ever limit your activities, threaten you, or make you feel unsafe in any other way?** (Yes)	8.0 (±4.1)	5.7 (±0.9)
5. In the past 12 months, how many times did someone you were dating or going out with physically hurt you on purpose? (Count such things as being hit, slammed into something, or injured with an object or weapon.)** (Yes)	4.0 (±2.9)	2.8 (±0.6)
6. Have you ever been in a situation where someone made you engage in kissing, sexual touch or intercourse when you did not want to? (Yes)	N/S	13.7 (±2.2)
7. Not counting TV, movies, video games, and sporting events, have you seen an adult hit, slap, punch, shove, kick, or otherwise physically hurt another adult more than one time? (Yes)	26.6 (±6.6)	21.8 (±2.1)
8. Has an adult ever physically hurt you on purpose (like pushed, slapped, hit, kicked or punched you), leaving a mark, bruise or injury? (Yes)	21.3 (±6.1)	18.0 (±1.5)
9. How often does a parent or adult in your home swear at you, insult you, put you down or humiliate you? (Sometimes, Often, Very often)	34.3 (±7.1)	30.7 (±2.0)
10. Are your current living arrangements the result of losing your home because your family cannot afford housing? (Yes)	3.0 (±1.8)	2.5 (±0.4)
11. How often in the past 12 months did you or your family have to cut meal size or skip meals because there wasn't enough money for food? (Any times)	5.1 (±2.4)	5.9 (±1.0)

*in past 30 days, **in past 12 months

NOTE: Some students did not answer all 11 WAH-ACEs questions on the survey. To calculate their individual scores and account for those missing answers, a method called multiple imputation was used. This method also used predictors such as mother's education, sex, and race/ethnicity to estimate students' WAH-ACEs score. The percentages in the table above do not represent the imputed results used to compute the WAH-ACEs score. The results in the table match the non-imputed results in frequency reports. Learn more about how WAH-ACEs scores are created in the *WAH-ACEs Interpretive Guide*.

State Level WAH-ACEs and Key Takeaways

State level WAH-ACEs data highlight some important patterns among Washington students overall that also match what is in the scientific literature. Studies also indicate that students who report more adverse experiences tend to also report other negative exposures, behaviors, and outcomes. Adverse experiences do not necessarily cause these other things to happen, but they can often appear together in the same youth, making them even more likely to experience poor health and educational outcomes.

Statewide Relationship between WAH-ACEs score and mental health indicators, Grade 10

Statewide, more 10th grade students who felt sad or hopeless for at least two weeks in the past year reported higher WAH-ACEs scores.

Similarly, more 10th grade students who reported contemplating suicide reported higher WAH-ACEs scores than those who did not consider suicide.

Statewide Relationship between WAH-ACEs score and Hope Scale, Grade 10

Statewide, 10th grade students who reported more hope tended to also have a lower WAH-ACEs scores.

NOTE: Hope is the belief that the future can be better than the past and you play a role in making it so. Hope can also be taught.

Washington HYS Adverse Childhood Experiences (WAH-ACEs)

Year: 2021

Grade: 12

Sex: All

Number of Students Surveyed: 220

BACKGROUND

- o Adverse Childhood Experience (ACEs) are indicators of severe stressors that occur during a person's first 18 years of life. Research has shown that these adverse experiences can influence physical, mental, social, and behavioral health across the lifespan.
- o The Washington HYS ACEs Score (WAH-ACEs) assesses 11 adverse experiences that youth may report on the HYS to better assess the burden of these experiences among our state's youth.
- o WAH-ACEs can be used to understand the local levels of exposure to childhood adversity, and the relationships between these experiences and other questions on the survey.
- o WAH-ACEs is not comprehensive of all adverse experiences a child may be exposed to. For example, racism, poverty, and discrimination are examples of childhood adversity and are not included in the WAH-ACEs score.
- o You can learn more about how the scores were developed and how they can be interpreted in the [WAH-ACEs Interpretive Guide](#)

Frequency of WAH-ACEs score compared to the state, Grade 12

NOTE: While each student can have a WAH-ACEs of 0-11, the number of students who report more than 4 adverse experiences is quite small and decreases as the score increases. To protect student privacy and reduce the amount of data that must be suppressed, we have grouped those students into a 4+ WAH-ACEs category.

Missing Codes

S = result suppressed due to insufficient reporting

Prevalence is displayed with 95% confidence intervals (as ± or black bar |).

Results generated at askhys.net on 03/15/2022

WAH-ACEs on Healthy Youth Survey

HYS questions included in the WAH-ACEs score	District %	State %
1. I feel safe during school (NO!/no).	14.1 (±4.8)	17.6 (±2.2)
2. During the past 30 days, on how many days did you not go to school because you felt you would be unsafe on your way to and from school?* (Any days)	10.5 (±5.7)	9.5 (±2.0)
3. Bullying is when one or more students threaten, spread rumors about, hit, shove, or otherwise hurt another student over and over again. It is not bullying when two students of about the same strength or power argue or fight or tease each other in a friendly way. In the last 30 days, how often have you been bullied?* (Any days)	12.6 (±4.6)	12.7 (±1.3)
4. During the past 12 months, did someone you were dating or going out with ever limit your activities, threaten you, or make you feel unsafe in any other way?** (Yes)	6.9 (±4.7)	8.8 (±1.4)
5. In the past 12 months, how many times did someone you were dating or going out with physically hurt you on purpose? (Count such things as being hit, slammed into something, or injured with an object or weapon.)** (Yes)	6.9 (±4.7)	3.7 (±0.9)
6. Have you ever been in a situation where someone made you engage in kissing, sexual touch or intercourse when you did not want to? (Yes)	N/S	22.3 (±3.5)
7. Not counting TV, movies, video games, and sporting events, have you seen an adult hit, slap, punch, shove, kick, or otherwise physically hurt another adult more than one time? (Yes)	26.3 (±8.2)	23.8 (±2.3)
8. Has an adult ever physically hurt you on purpose (like pushed, slapped, hit, kicked or punched you), leaving a mark, bruise or injury? (Yes)	22.8 (±7.8)	20.2 (±2.1)
9. How often does a parent or adult in your home swear at you, insult you, put you down or humiliate you? (Sometimes, Often, Very often)	29.3 (±8.4)	33.8 (±2.3)
10. Are your current living arrangements the result of losing your home because your family cannot afford housing? (Yes)	3.8 (±2.6)	3.0 (±0.6)
11. How often in the past 12 months did you or your family have to cut meal size or skip meals because there wasn't enough money for food? (Any times)	7.2 (±3.6)	7.6 (±1.4)

*in past 30 days, **in past 12 months

NOTE: Some students did not answer all 11 WAH-ACEs questions on the survey. To calculate their individual scores and account for those missing answers, a method called multiple imputation was used. This method also used predictors such as mother's education, sex, and race/ethnicity to estimate students' WAH-ACEs score. Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Poor diet and physical inactivity are risk factors for obesity and overweight among youth.
- Youth who have fewer opportunities for physical activity and increased time spent in sedentary activities such as watching television and using computers are more likely to be overweight.
- Factors that contribute to poor diet among youth include eating fewer meals at home, increased availability and affordability of unhealthy food, and increased food portion sizes.
- To be successful in increasing healthy weight among youth; governments, communities and people need to work together to create environments that support healthy diets and opportunities for physical activity.

Are OUR youth using alcohol?

Current Drinking

Students who report drinking at least once in the past month

Experimental Drinking

Students who report drinking on 1-2 days in the past month, but no binge drinking

Problem or Heavy Drinking

Students who report drinking 3 or more days in the past month and/or one or more binge drinking episodes*

In a Vehicle

Students who report drinking and driving OR riding with a driver who had been drinking

■ Drove after drinking ■ Rode with drinking driver

On school property

Students who report drinking on school property in the past month

Where Do Youth Get Alcohol?

The percentages in this chart are based on all students who reported getting alcohol in the past 30 days, regardless whether they reported drinking in the past 30 days. Students could select multiple sources.

The data in these charts are based on the Healthy Youth Survey conducted in fall 2021. In Longview School District, 368 6th graders, 403 8th graders, 352 10th graders and 220 12th graders completed the survey.

For more results from the 2021 Healthy Youth Survey, please visit www.AskHYS.net

Parents and friends have influence!

Youth are less likely to drink if they believe their parents or their friends disapprove of youth drinking.

Percent of 10th Graders who Drink Alcohol (Statewide)

What does this chart say?

- Only 5% of youth drink alcohol if their parents think it's wrong, while 23% drink if their parents don't think it's wrong
- Only 5% of youth drink alcohol if their friends think it's wrong, while 22% drink if their friends don't think it's wrong.

Youth in Longview School District reported that they believe...

■ Parents would catch me if I had been drinking
■ Parents think youth drinking is wrong

■ Police would catch me if I had been drinking
■ Friends think that youth drinking is wrong

Take action to reduce youth alcohol use!

Community Members - help reduce youth drinking by making it difficult for them to get alcohol.

The percent of Longview School District youth who think that it would be easy to get alcohol increases as they get older, from 10% in 6th Grade to 48% in 12th Grade.

Parents - talk to your kids about the dangers of drinking alcohol.

The percent of Longview School District youth who said their parents **didn't** talk to them about the dangers of alcohol increases as they get older, from 25% in 8th Grade to 41% in 12th Grade.

Help youth make healthy choices

FACT SHEET

Migratory Students of Longview School District

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background

The purpose of this report is to provide stakeholders a comparative overview of the health status, behaviors, and access to healthcare coverage between self-identified migratory students of Washington State, as defined by Title I. Part C Migrant Education Program (MEP), and their non-migrant student counterparts.

The HYS data suggests that there are significantly higher health disparities among Migratory students compared to non-Migratory Washington students. Although Migratory students have access to state and federal funded healthcare coverage, there are evident gaps in accessing healthcare services that may be contributing to greater disparities overall. Other contributing factors such as higher rates of mobility due to the pursuit of temporary or seasonal agricultural work, fear of seeking services, along with other socioeconomic barriers, also impact migrant student's full academic engagement such as attendance, academic participation, and graduation.

**Migrant Status
Compared to the State, All Grades, 2021**

Prevalence	6th	8th	10th	12th
Local	20% ±4	13% ±3	10% ±3	6% ±3
State	14% ±1	11% ±1	8% ±1	6% ±1

Migrant Status 2018-2021, Grade 10

Prevalence	2018	2021
Migrant status	9% ±4	10% ±3

* Students self-identified as having moved independently or with family in the past 3 years to another school district or city for temporary or seasonal work in agriculture, dairy, or fishing.

Statewide Relationships between Migrant Status, Grade 10

For 10th grade **migrant** students statewide, are:

- More likely to report getting lower grades in school (mostly C's, D's, or F's)
- More likely to have skipped or "cut" school in the past month
- More likely to have been bullied in the past month
- More likely to have missed school due to a toothache in the past year
- More likely to report binge drinking in the past 2 weeks
- More likely to have made a suicide attempt in the past year

Compared to those with **non-migrant** students.

FACT SHEET

Migratory Students of Longview School District

Year: 2021 Grade: 12 Sex: All Number of Students Surveyed: 220

Background

The purpose of this report is to provide stakeholders a comparative overview of the health status, behaviors, and access to healthcare coverage between self-identified migratory students of Washington State, as defined by Title I. Part C Migrant Education Program (MEP), and their non-migrant student counterparts.

The HYS data suggests that there are significantly higher health disparities among Migratory students compared to non-Migratory Washington students. Although Migratory students have access to state and federal funded healthcare coverage, there are evident gaps in accessing healthcare services that may be contributing to greater disparities overall. Other contributing factors such as higher rates of mobility due to the pursuit of temporary or seasonal agricultural work, fear of seeking services, along with other socioeconomic barriers, also impact migrant student's full academic engagement such as attendance, academic participation, and graduation.

FACT SHEET

Measuring Hope in Longview School District

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background

Hope is the belief that the future can be better than the past and you play a role in making it so.

Hope is made up of goals, pathways, and agency.

Four questions from the **Children's Hope Scale** were asked on the survey.

- Two questions about **pathways**; figuring out how to get from point A to point B to reach a goal.
- Two questions about **agency/willpower**; self-efficacy & motivation to use multiple ways to reach a goal.

Adding up the results from the four questions provides overall hope scores.

- No to very low hope
- Slightly hopeful
- Moderately hopeful
- Highly hopeful

Hope Scale Component
Questions Grade 10, 2021

Pathway Questions:

- I can think of many ways to get the things in life that are most important to me.
- When I have a problem, I can come up with lots of ways to solve it.

Pathways thinking is a child's belief in their capacity to find multiple ways to reach their goals.

Agency Questions:

- I am doing just as well as other kids my age.
- I think the things I have done in the past will help me in the future.

Agency thinking is a child's self-efficacy and motivation to use multiple ways to reach their goal.

FACT SHEET

Measuring Hope

Levels of Hope Grade 10, 2021

Research has shown that hope can be taught and is connected to academic achievements, well-being and positive life outcomes.

Levels of Hope 2018-2021, Grade 10

Prevalence	2018	2021
No or very low hope	5% ±3	9% ±3
Slight hope	17% ±6	15% ±4
Moderate hope	24% ±7	30% ±5
High hope	53% ±8	46% ±5

High Hope, All Grades, 2021

Prevalence	6th	8th	10th	12th

State	43% ±3	44% ±2	44% ±3	46% ±3

FACT SHEET

Measuring Hope

Statewide Relationships between High Hope, Grade 10

For 10th graders statewide, those with **high levels of hope** are:

- More likely to find courses more interesting and helpful for their future
- More likely to think the things they are learning in school will be important later in life
- More likely to report having a person at schools that could help them if needed
- More likely to report getting high grades (A's or B's)

Compared to those with **lower levels of hope**.

For 10th graders statewide, those with **high levels of hope** are:

- Less likely to be absent from school in the past month
- Less likely to not have eaten breakfast
- Less likely to not feel safe during school
- Less likely to use marijuana in the past 30 days
- Less likely to feel sad or hopeless
- Less likely to have seriously considered suicide in the past year

Compared to those with **lower levels of hope**.

results generated at www.askhys.net on 03/20/2022

Year: 2021

Grade: 10

Sex: All

Number of Students Surveyed: 352

Background:

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each “factor” in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the “percent of students at risk,” which is defined as the percent of students whose scores were above a risk cutpoint determined by UW researchers. We also report some of the individual questions.
- Risk factors in the **peer and individual domain** include attitudes youth have about substance use as well as the behaviors of their friends.

For More Information:

- To learn more go to the Start Talking Now website: www.StartTalkingNow.org. To find out about prevention coalitions in your area and how to get involved, go to https://www.theathenaforum.org/cpwi_coalitions.
- For free guides on preventing alcohol and other drug use, visit the ADAI Clearinghouse <http://adaiclearinghouse.net> or call (206) 221-8325.
- For prevention tips and other online resources, visit www.StartTalkingNow.org and www.drugfree.org.
- For 24 hour help for mental health, substance use and misuse, and problem gambling, call 1-866-789-1511 or visit www.waRecoveryHelpLine.org.

**Peer-Individual Risk Factors
Grade 10, 2021**

**Peer-Individual Risk Factor 2010-2021
Grade 10**

**Risk Factor: Perceived Risk of Drug Use
Compared to the State, All Grades, 2021**

Prevalence	6th	8th	10th	12th
Local	54% ±6*	48% ±7	41% ±8	53% ±11
State	45% ±3	45% ±2	38% ±3	49% ±4

Prevalence	2010	2012	2014	2016	2018	2021
Perceived Risk of Drug Use	32% ±6	43% ±8*	44% ±7	38% ±8	42% ±8	41% ±8
Favorable Attitudes Towards Drug Use	30% ±6	34% ±8	37% ±7	34% ±7	33% ±7	32% ±7
Friends Use of Drugs	24% ±6	24% ±7	22% ±6	23% ±7	21% ±7	12% ±5*
Intentions to Use Drugs	40% ±7	39% ±8	N/S	N/S	N/S	N/S

In 2021, 32% of 10th graders in our school district were at risk for favorable attitudes towards drugs.

From 2018 to 2021, there has been no change in the perceived risk of drug use among 10th graders in our school district.

Prevalence	2010	2012	2014	2016	2018	2021
Perceived Risk of Drug Use	37% ±8	47% ±9	S	56% ±9	S	53% ±11
Favorable Attitudes Towards Drug Use	29% ±8	36% ±8	S	36% ±9	S	42% ±10
Friends Use of Drugs	24% ±7	22% ±7	S	18% ±7	S	30% ±9*
Intentions to Use Drugs	33% ±8	30% ±8	S	N/S	S	N/S

In 2021, 42% of 12th graders in our school district were at risk for favorable attitudes towards drugs.

From 2018 to 2021, there has been no change in the perceived risk of drug use among 12th graders in our school district.

Year: 2021

Grade: 6

Sex: All

Number of Students Surveyed: 368

Background:

- Researchers at the University of Washington (UW) developed a public health model for the prevention of youth substance use and misuse. They identified risk factors that predict youth substance use, and protective factors that can protect youth from the effects of those risks. Prevention strategies are designed to lower risk and increase protection.
- Each “factor” in the HYS is measured with two or more questions to include multiple dimensions of the risk or protective factor. The charts and tables below refer to the “percent of students at risk,” which is defined as the percent of students whose scores were above a risk cutpoint determined by UW researchers. We also report some of the individual questions.
- Risk factors in the **peer and individual domain** include attitudes youth have about substance use as well as the behaviors of their friends.

For More Information:
